Declaration of Academic Integrity for BA and MA theses (For Use in the Thesis Planner)
TH Wildau Senate Resolution of May 27, 2024

I solemnly swear that I have conceived and written the present thesis independently and exclusively using permissible aids. I have not used any sources or aids other than those indicated. In particular, I have fully listed all AI-based tools (AI tools) used as aids, including their product names and an overview of the scope of functions and purposes of use within the framework of this thesis/study work.

I have identified all content taken from sources or generated by AI tools, whether used unchanged or paraphrased, and have provided the corresponding sources or included the full command call (e.g., the prompt or chat history used). This also applies to attached graphics, sketches, visual representations, and the like, as well as sources from the internet.

I am aware that submitting plagiarized work constitutes serious academic misconduct.

I consent to my work being checked for plagiarism and the use of AI tools using software. Deceptions will be sanctioned according to the examination regulations applicable to me. At the same time, I declare that neither this work – in this or an equivalent form – nor parts thereof have been submitted or published by me or any other person as part of an examination or academic achievement elsewhere.

I am aware that as the author of the present work, I bear full responsibility for the text.
