

Grain Price and Basis Indexes

Barchart's Grain Price and Basis Indexes deliver **accurate and transparent price indicators** for Corn, Soybeans, and Wheat—supporting trading strategies with a unique dataset that blends historical data and real-time streaming for precise market insights.

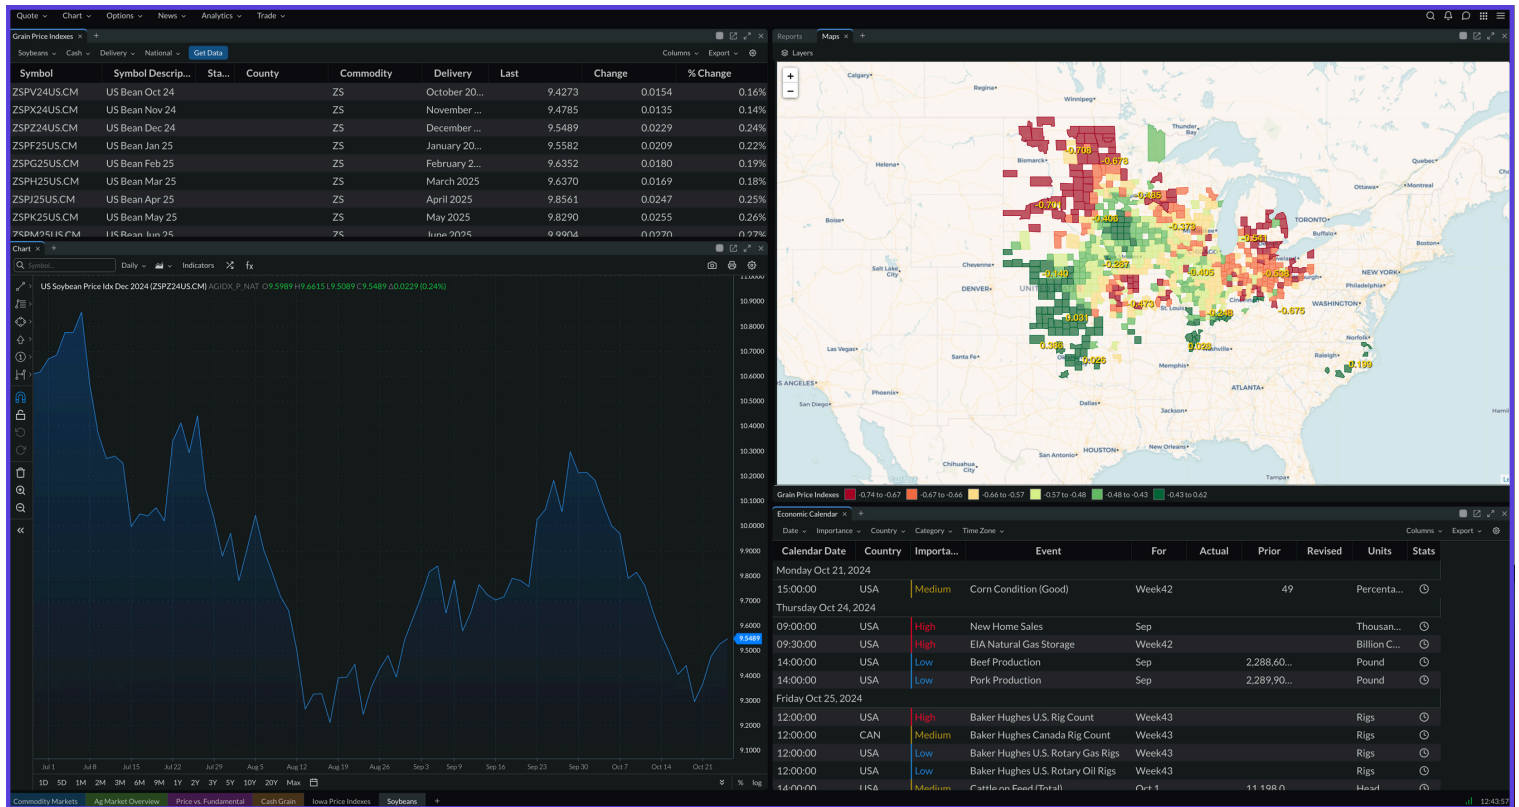

Powered by leading alternative data, these indexes offer precise and reliable price indicators

Our indicator methodology utilizes a sophisticated yet transparent weighting process to ensure that our prices are both objective and accurately represent the underlying market economics. By incorporating price, capacity, and throughput, Barchart's grain price and basis indexes provide a unique, easy and smart way of monitoring indicators.

We calculate continuous and end-of-day price and basis levels for individual Counties up to our benchmark National Index – **historical data is available from 2014.**
