Create a passionate organization generating value for clients, employees, stakeholders and society.

Help SME's and Large Enterprise solve complex testing problems using our technology expertise.

Build in-house QA Intellectual Property to provide industry leading best solutions to our clients in the enterprise, technology and Services domains.

Our Values

A | Customer First

C | Teamwork

B | Client Value Creation

D | Quality

Why Work With Us ?

One Stop QA Shop

High RoI on QA Investments

Proven Expertise in Large Scale Testing Programs

Establishing CoE

Engagement Models

Seasoned QA Professionals

We Work With

5

STARTUPS

SMALL BUSINESS

ENTERPRISE

Industries We Work

 FinTech	 Health Care	 Social	 E-Commerce	 Cloud	 CRM
 Banking	 Retails	 Telecom	 Insurance	 Mobile	 Enterprise

Our IP & Innovations

K-FAST

Automation projects at KiwiQA utilize a proprietary, home-grown framework called **K-FAST**, an acronymic for KiwiQA's Framework for Automated Software Testing. K-FAST has been time tested in many projects with excellent results and proven ease of use.

Automation Testing

K-SPARC

K-SPARC traverses through every stage of Performance Testing with a prime focus on throughput and application load. The framework begins from the study of performance requirements, running all the way to the preparation of the test execution summary report.

Load/Performance Testing

K-ASSIST

Test Strategy consultation is executed using a home-grown framework called **K-ASSIST**. We believe there is a lot of scope for the creation of value & innovation-driven solutions which will decrease cost while ensuring improvement in quality.

Test Consulting and Strategy

K-RASINS

At KiwiQA, Test Engineers follow "**K-RASINS**" a proprietary methodology for designing test cases, that help achieve maximum coverage. KiwiQA follows Test Case with a set of inputs, execution preconditions, and expected outcomes developed for a particular objective, that are based on business workflows to verify compliance with a specific requirement.

Proprietary methodology for designing test cases

Our Core Testing Services

Test Automation			Performance Testing
Mobile App Testing			Accessibility Testing
Security Testing			Game Testing
Functional Testing			Salesforce Testing

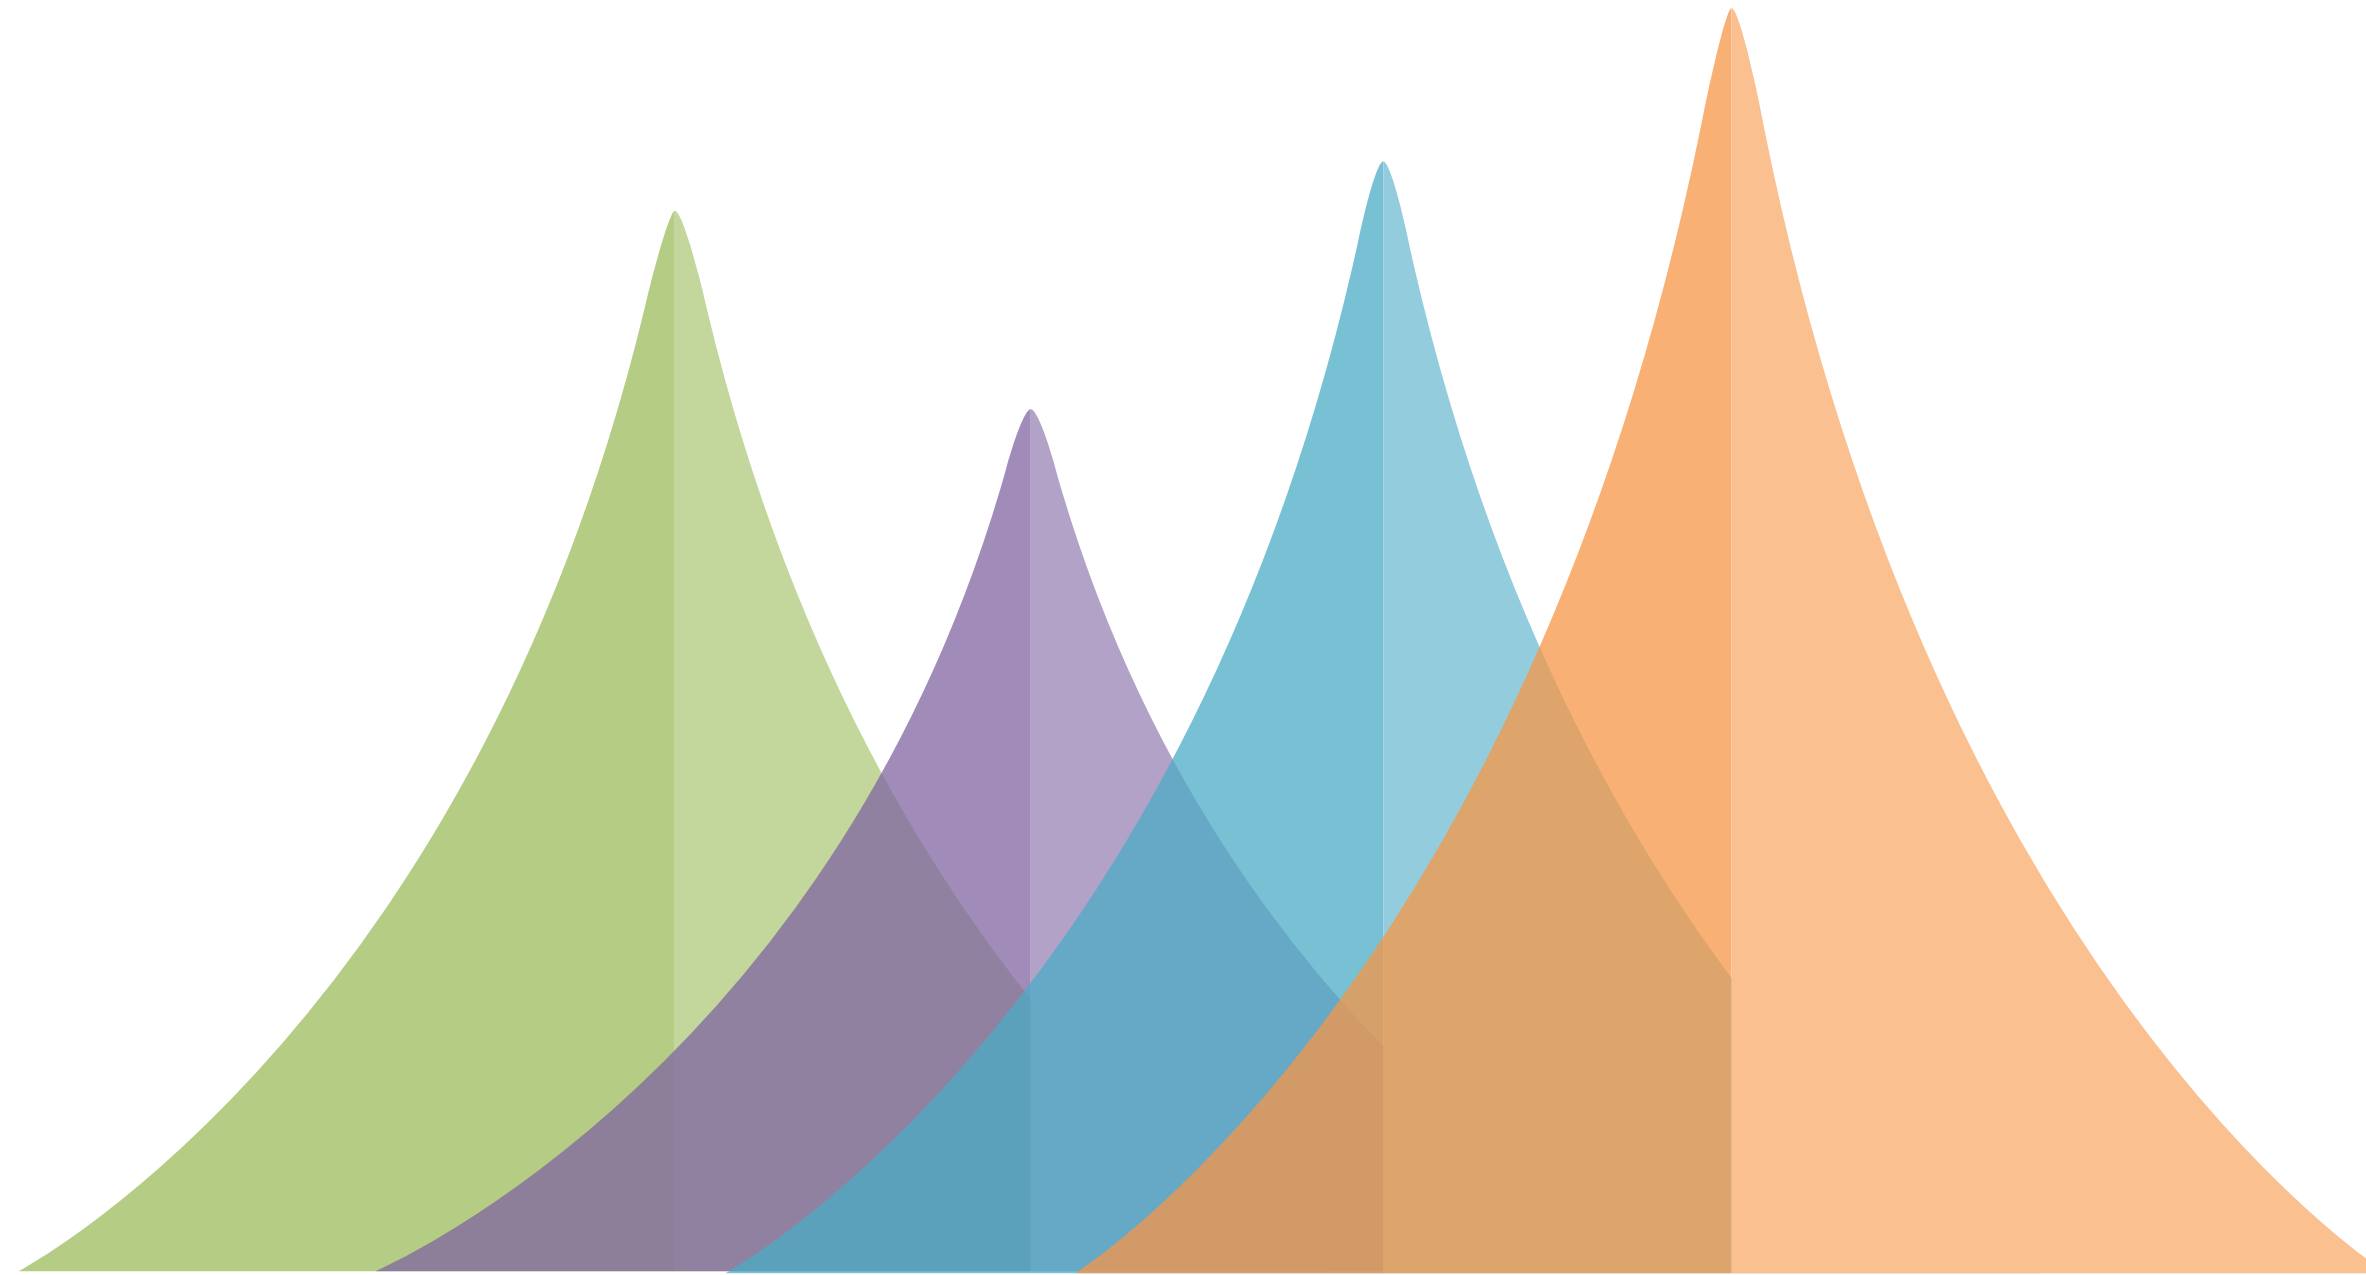

Our Digital Assurance Services

Artificial intelligence Testing			Exploratory Testing
Wearable Testing			AR-VR Testing
Blockchain Testing			iOT Testing
Visual Testing			ETL Testing

Our Consulting Services

 Test Automaton Advisory

 Dev-Ops Transformation

 Test Data Management

 General Test Consulting

 Performance Test Consulting

 Test Tool Advisory

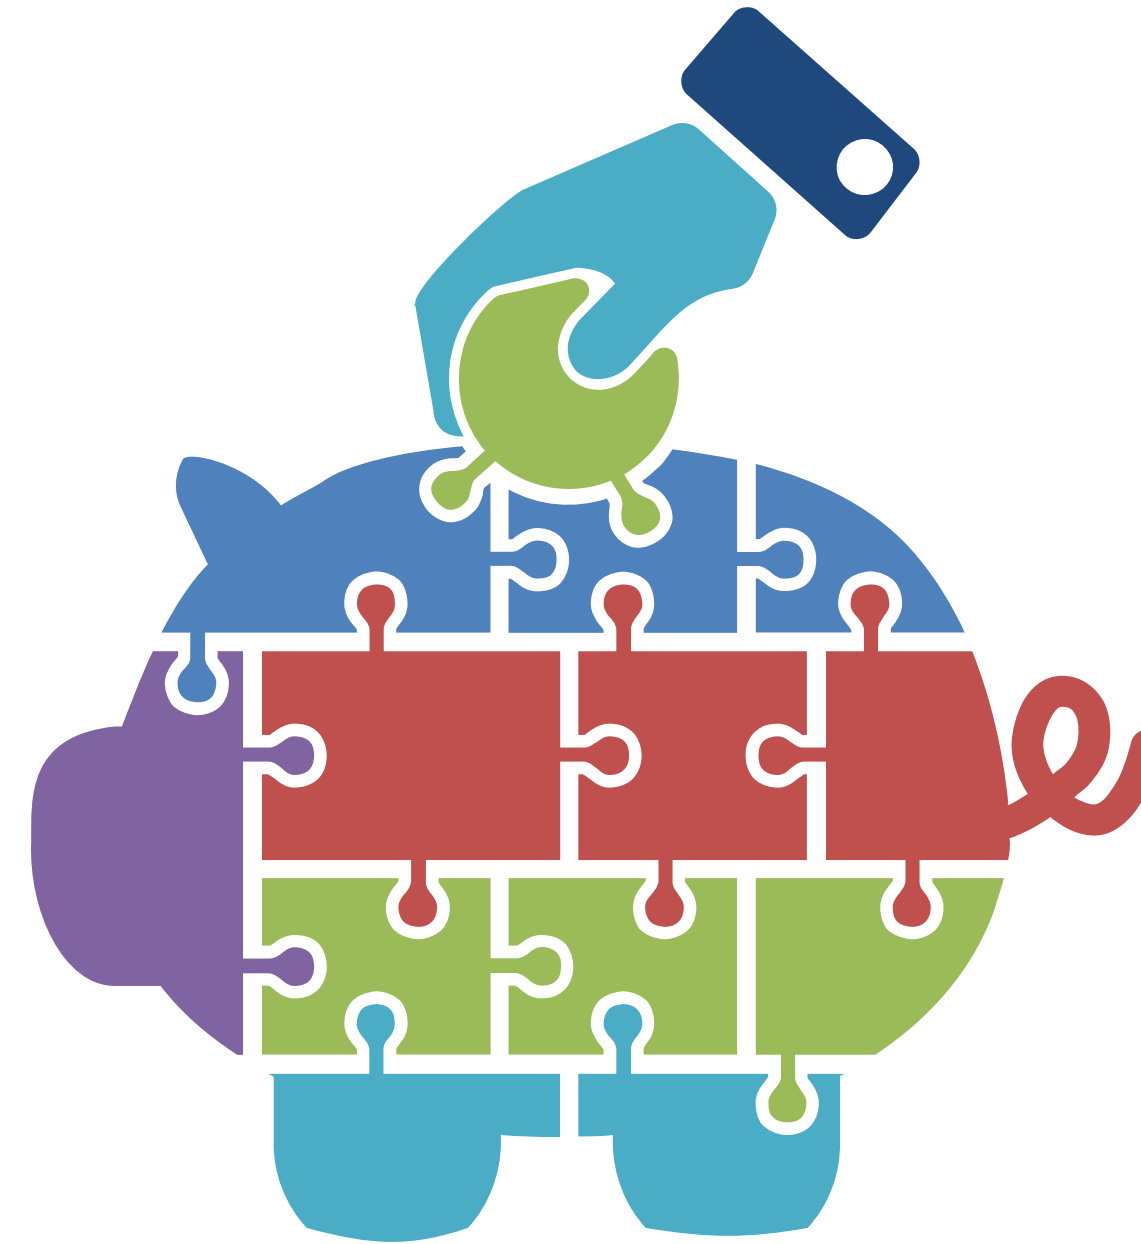

Technology We Test

Our Accredited Trainings

- ✓ ISTQB Foundation Level
- ✓ ISTQB Foundation Level Agile Tester
- ✓ ISTQB Advanced Technical Test Analyst
- ✓ ASTQB Certified Mobile Tester
- ✓ ASTQB Foundation Business Analyst
- ✓ TMMi Professional

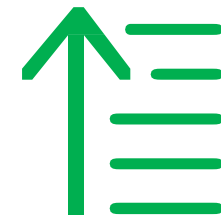

Test Automation

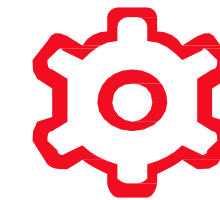

Development of Scripts

- Development in C# or Java
 - Enhancement
- Test Data Preparation

Commit to Repository

- Commit to GIT/Bitbucket

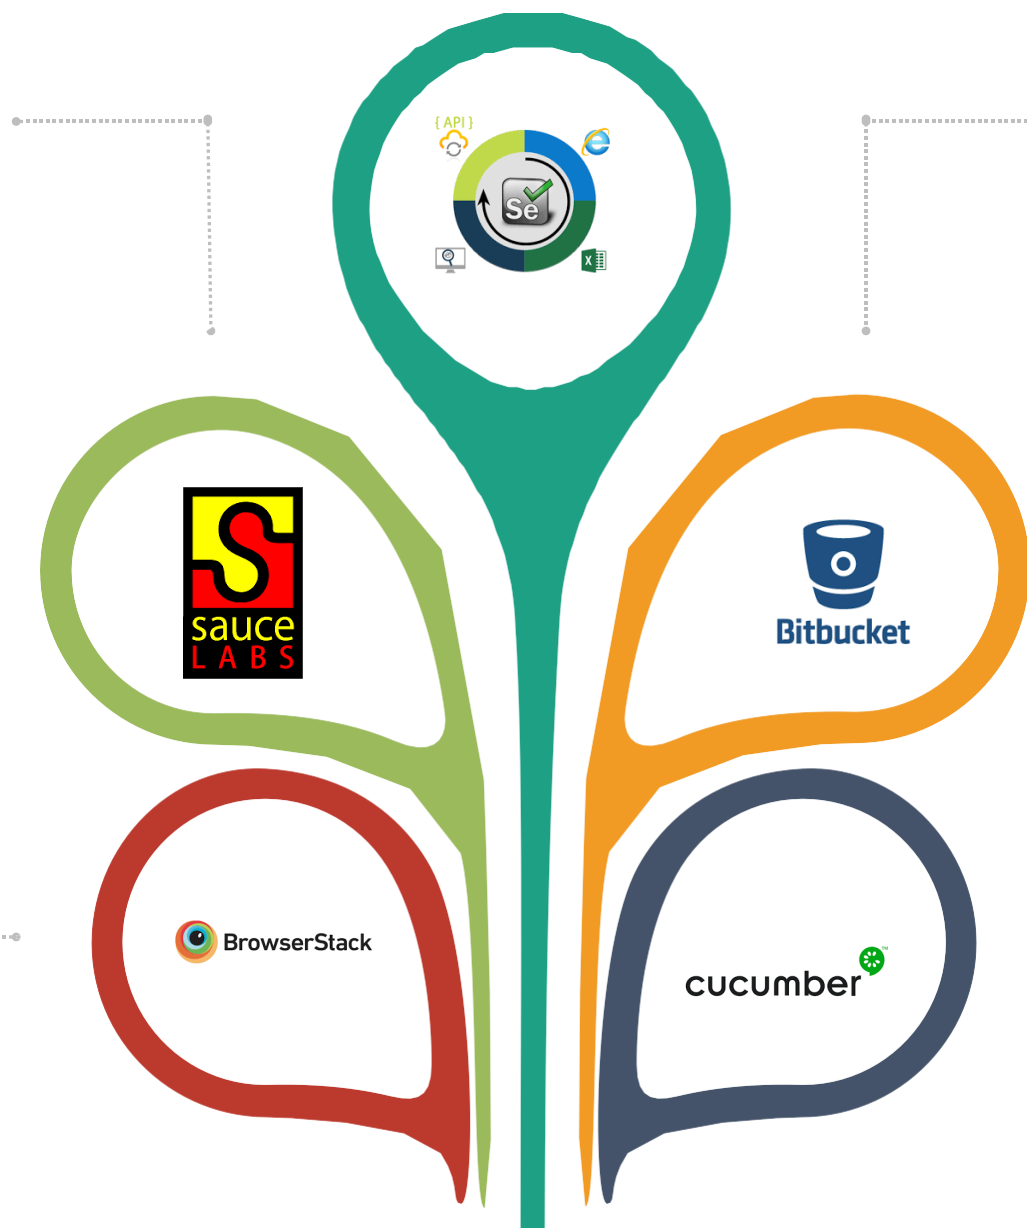

Distribute Test on Cloud

- Integration with CI
- Integration with Sauce Lab/Browser stack

Review Functional Testcases

- Define Use Cases/TestCases
 - Review & Approval

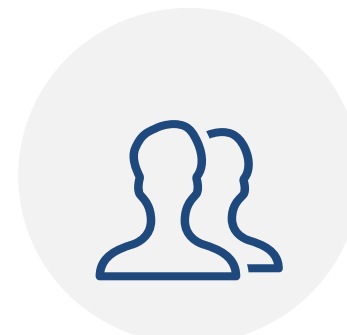

Automated Report Generation /Share Results

- Test Execution
- Defect Management
- Prepare Summary Report

Salesforce Testing

-  **Product Integration Testing**
Content Management +Oracle app + Marketing tools
-  **Configuration + Functional Testing**
-  **Test Automation**
-  **Performance Testing**
-  **Web services level Testing**

20+ Salesforce SME's

AI Driven Testing

Evaluation

- Assessment of QA CoE
- AI Tool capabilities demonstration to QA CoE
- Automation Proof of concept
 - Process improvement plan

Optimize

- Custom report preparation
- Dashboard

Build

- Tool procurement and Infra setup
- In-sprint automation
- Automation Regression backlog

Run

- Execution of the AI regression test suite
- CI/CD pipeline setup

Accessibility Testing

Comply with

WCAG 2.1	W3C WAI
508	USA
301549	EN
AODA	Canada

Mobile App Testing

Define

- Test Strategy
- Device Identification
- Analyze Market Trends

Automation

- iOS Automation
- Android Automation
- Device Certification

Develop

- Develop TestCases
- Lab Set up
- End to end Testing Setup

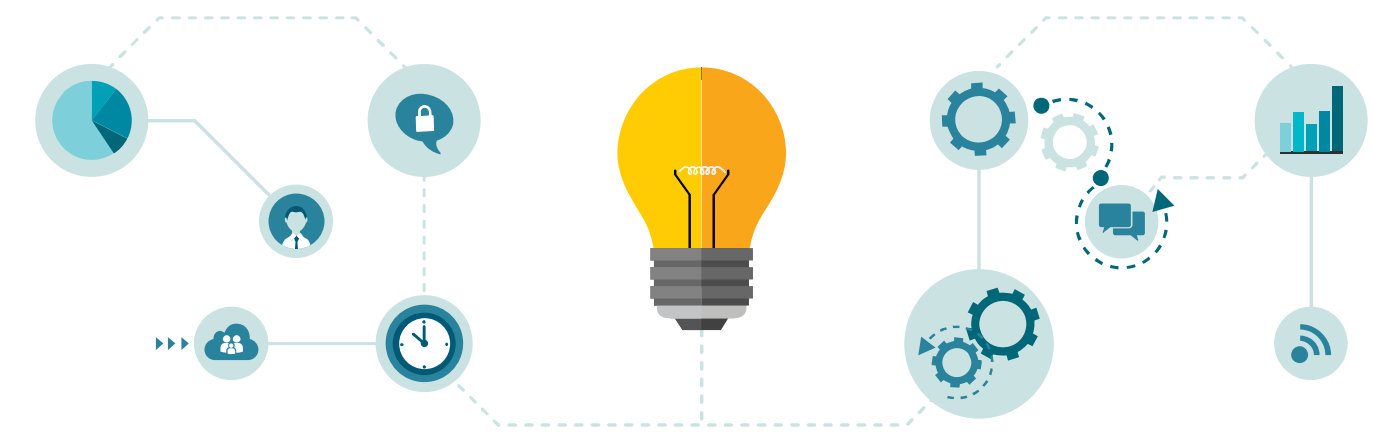

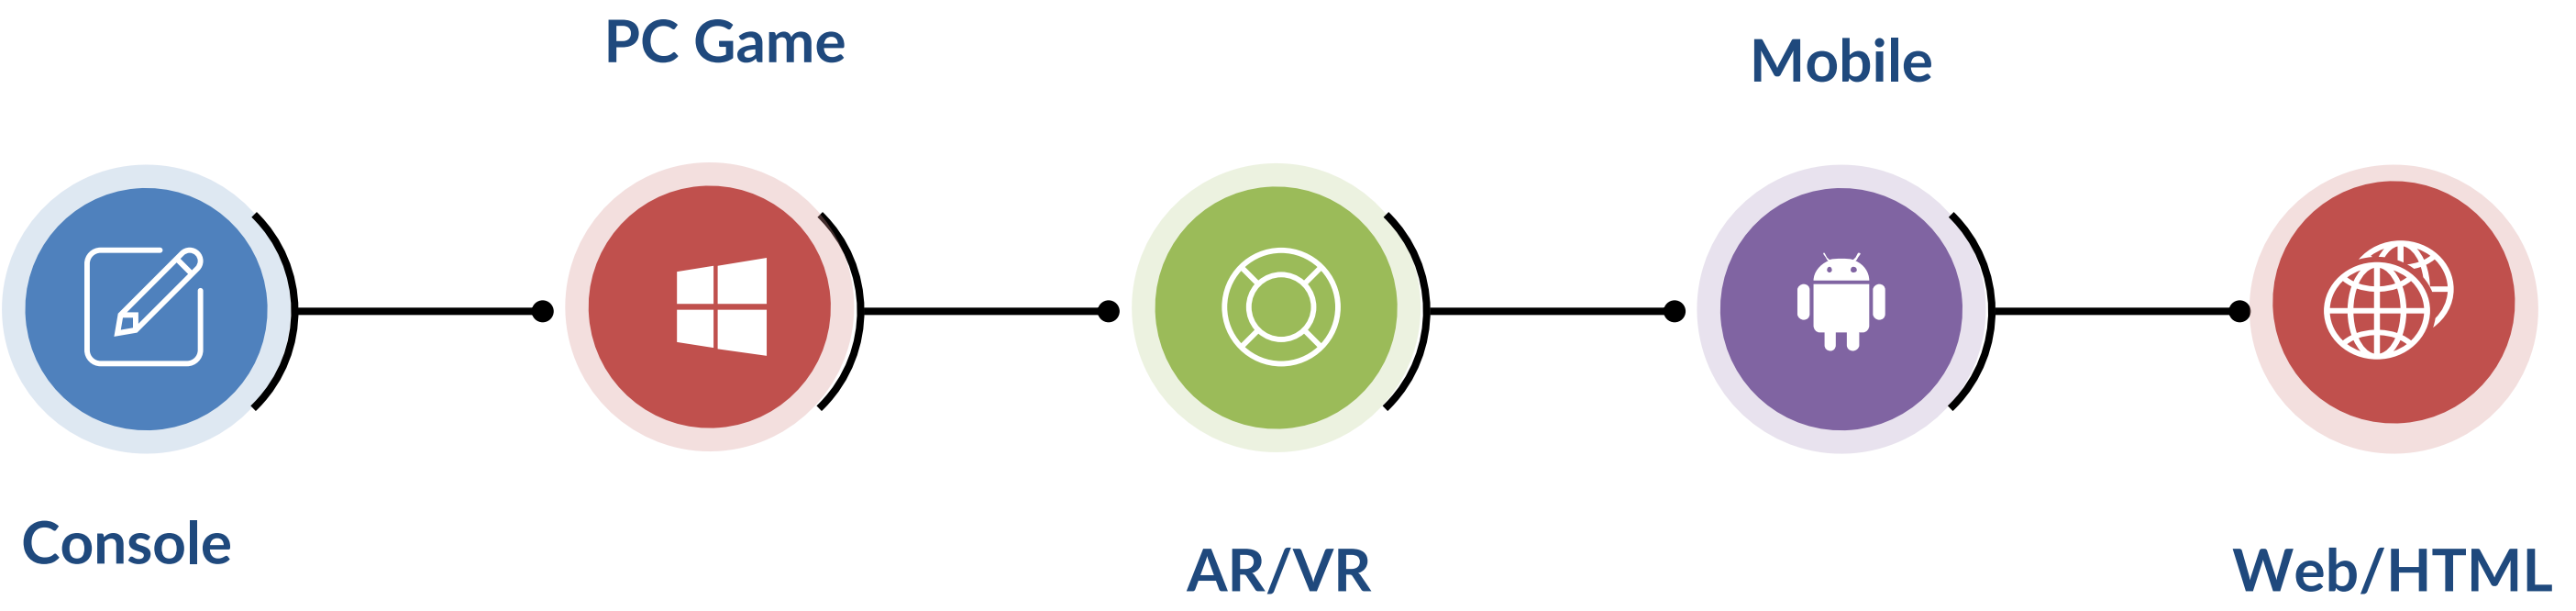

Deliver

- Real Handsets Testing
- Pre-Market handsetsTesting.

Game Testing

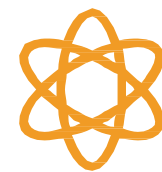

Performance Testing

Define & Design

- Define Performance Requirement
- Select Performance Testing Tools
- Procure Pre-Prod Test Environment
 - Define Test Data
 - Identify Potential Risks

Analysis & Certify

- Analysis based on performance Data
- Capacity measurement for web/DB server
- Final summary report Preparation

Develop

- Installation of tools
- Populate Test Data
- Design Test Scripts
- Dry run on Test Scripts

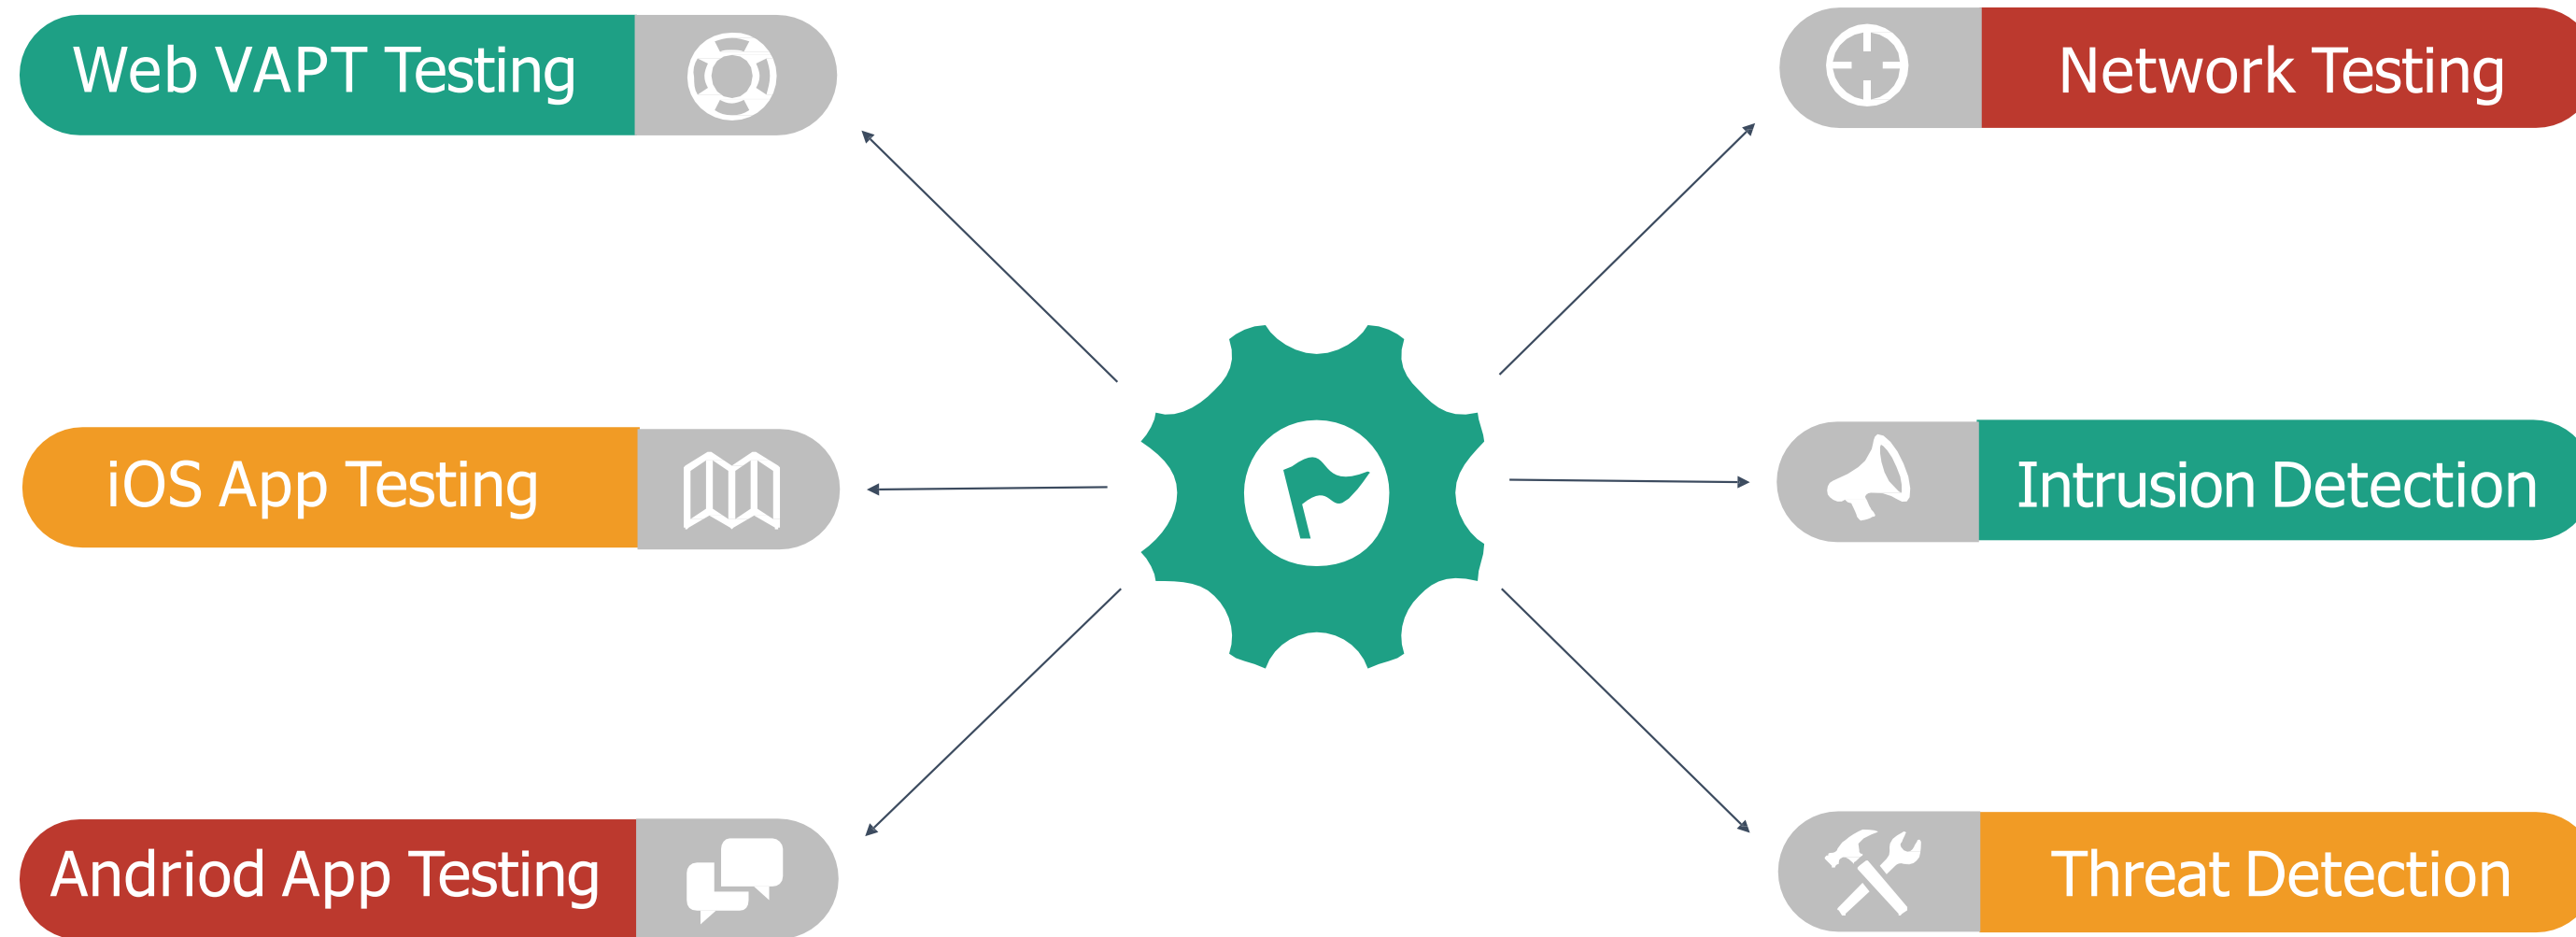

Test & Tune

- Execute The Scripts
- Tune Application Server
- Tune DB Server
- Tune the infrastructure

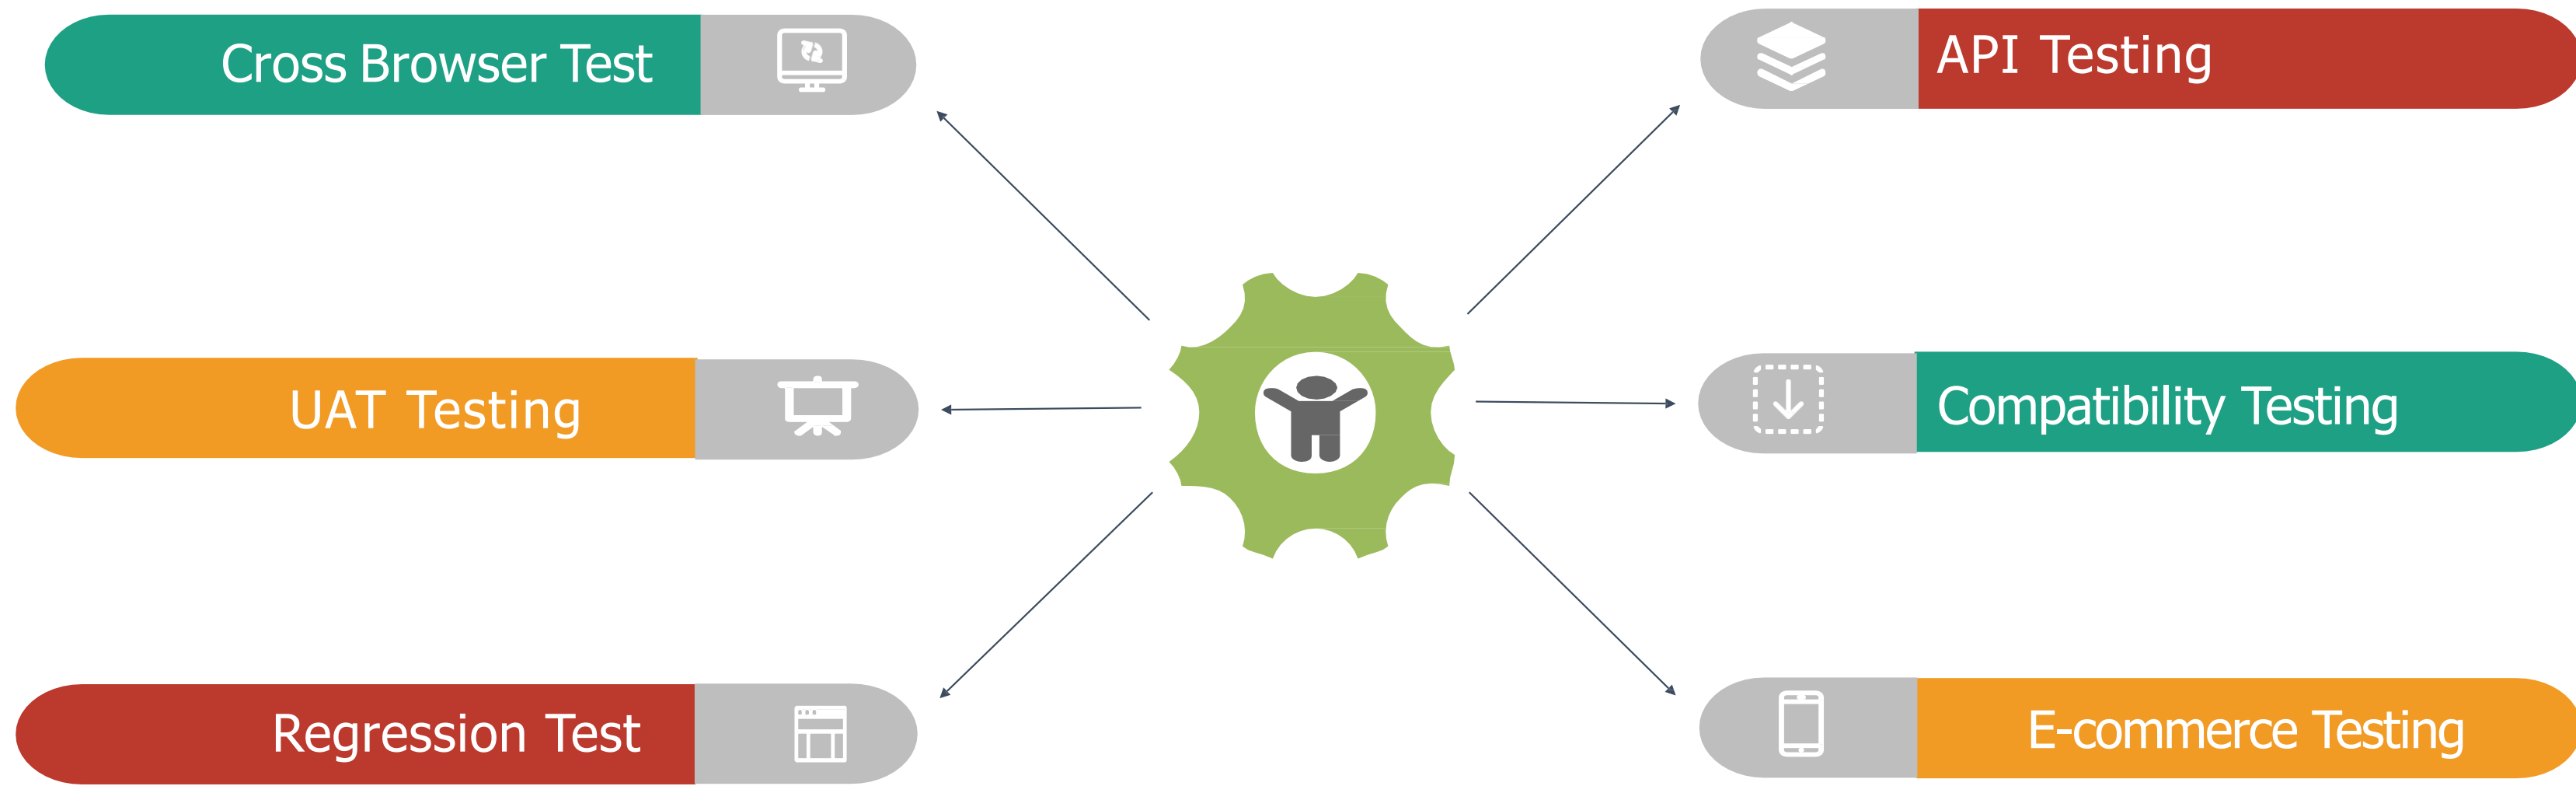

Security & Pen Testing

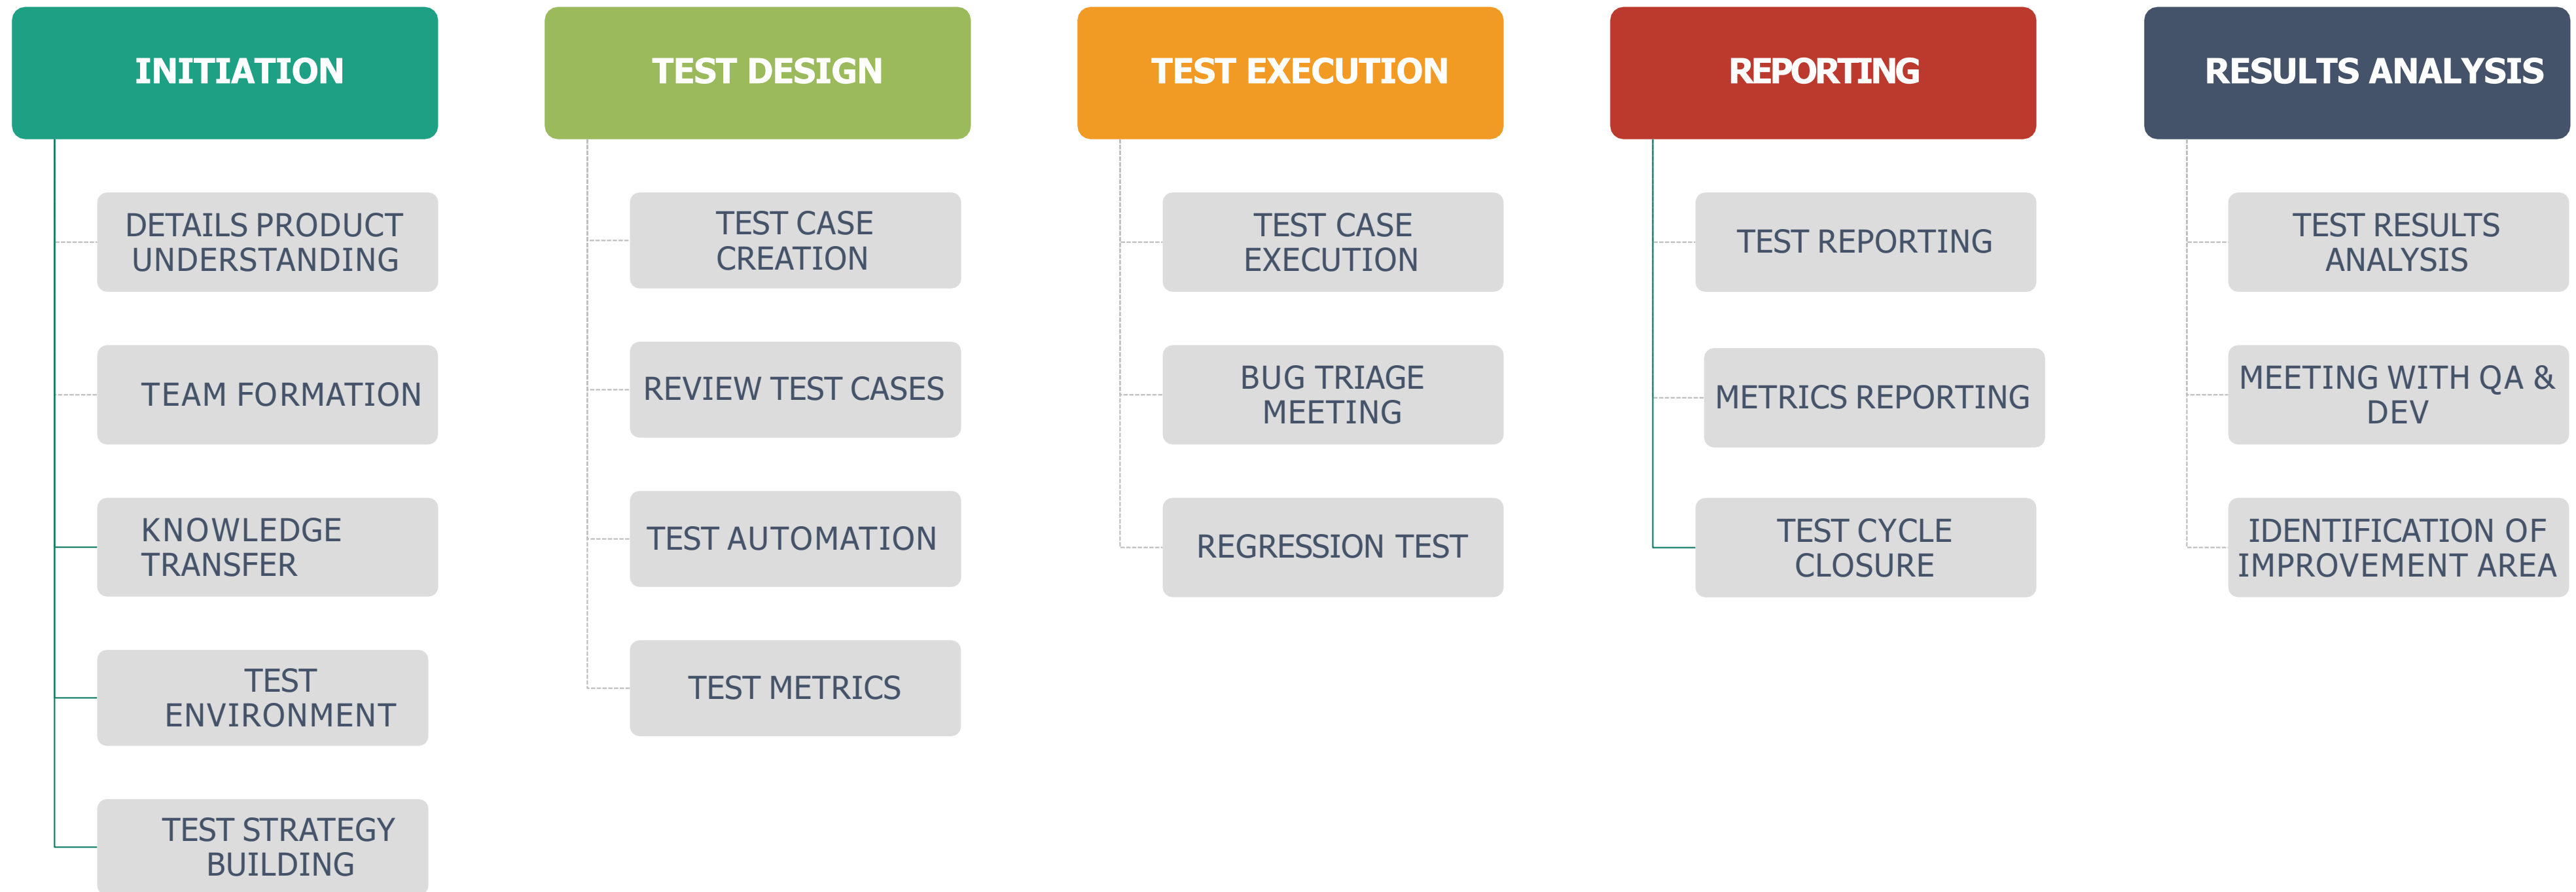

Functional Testing

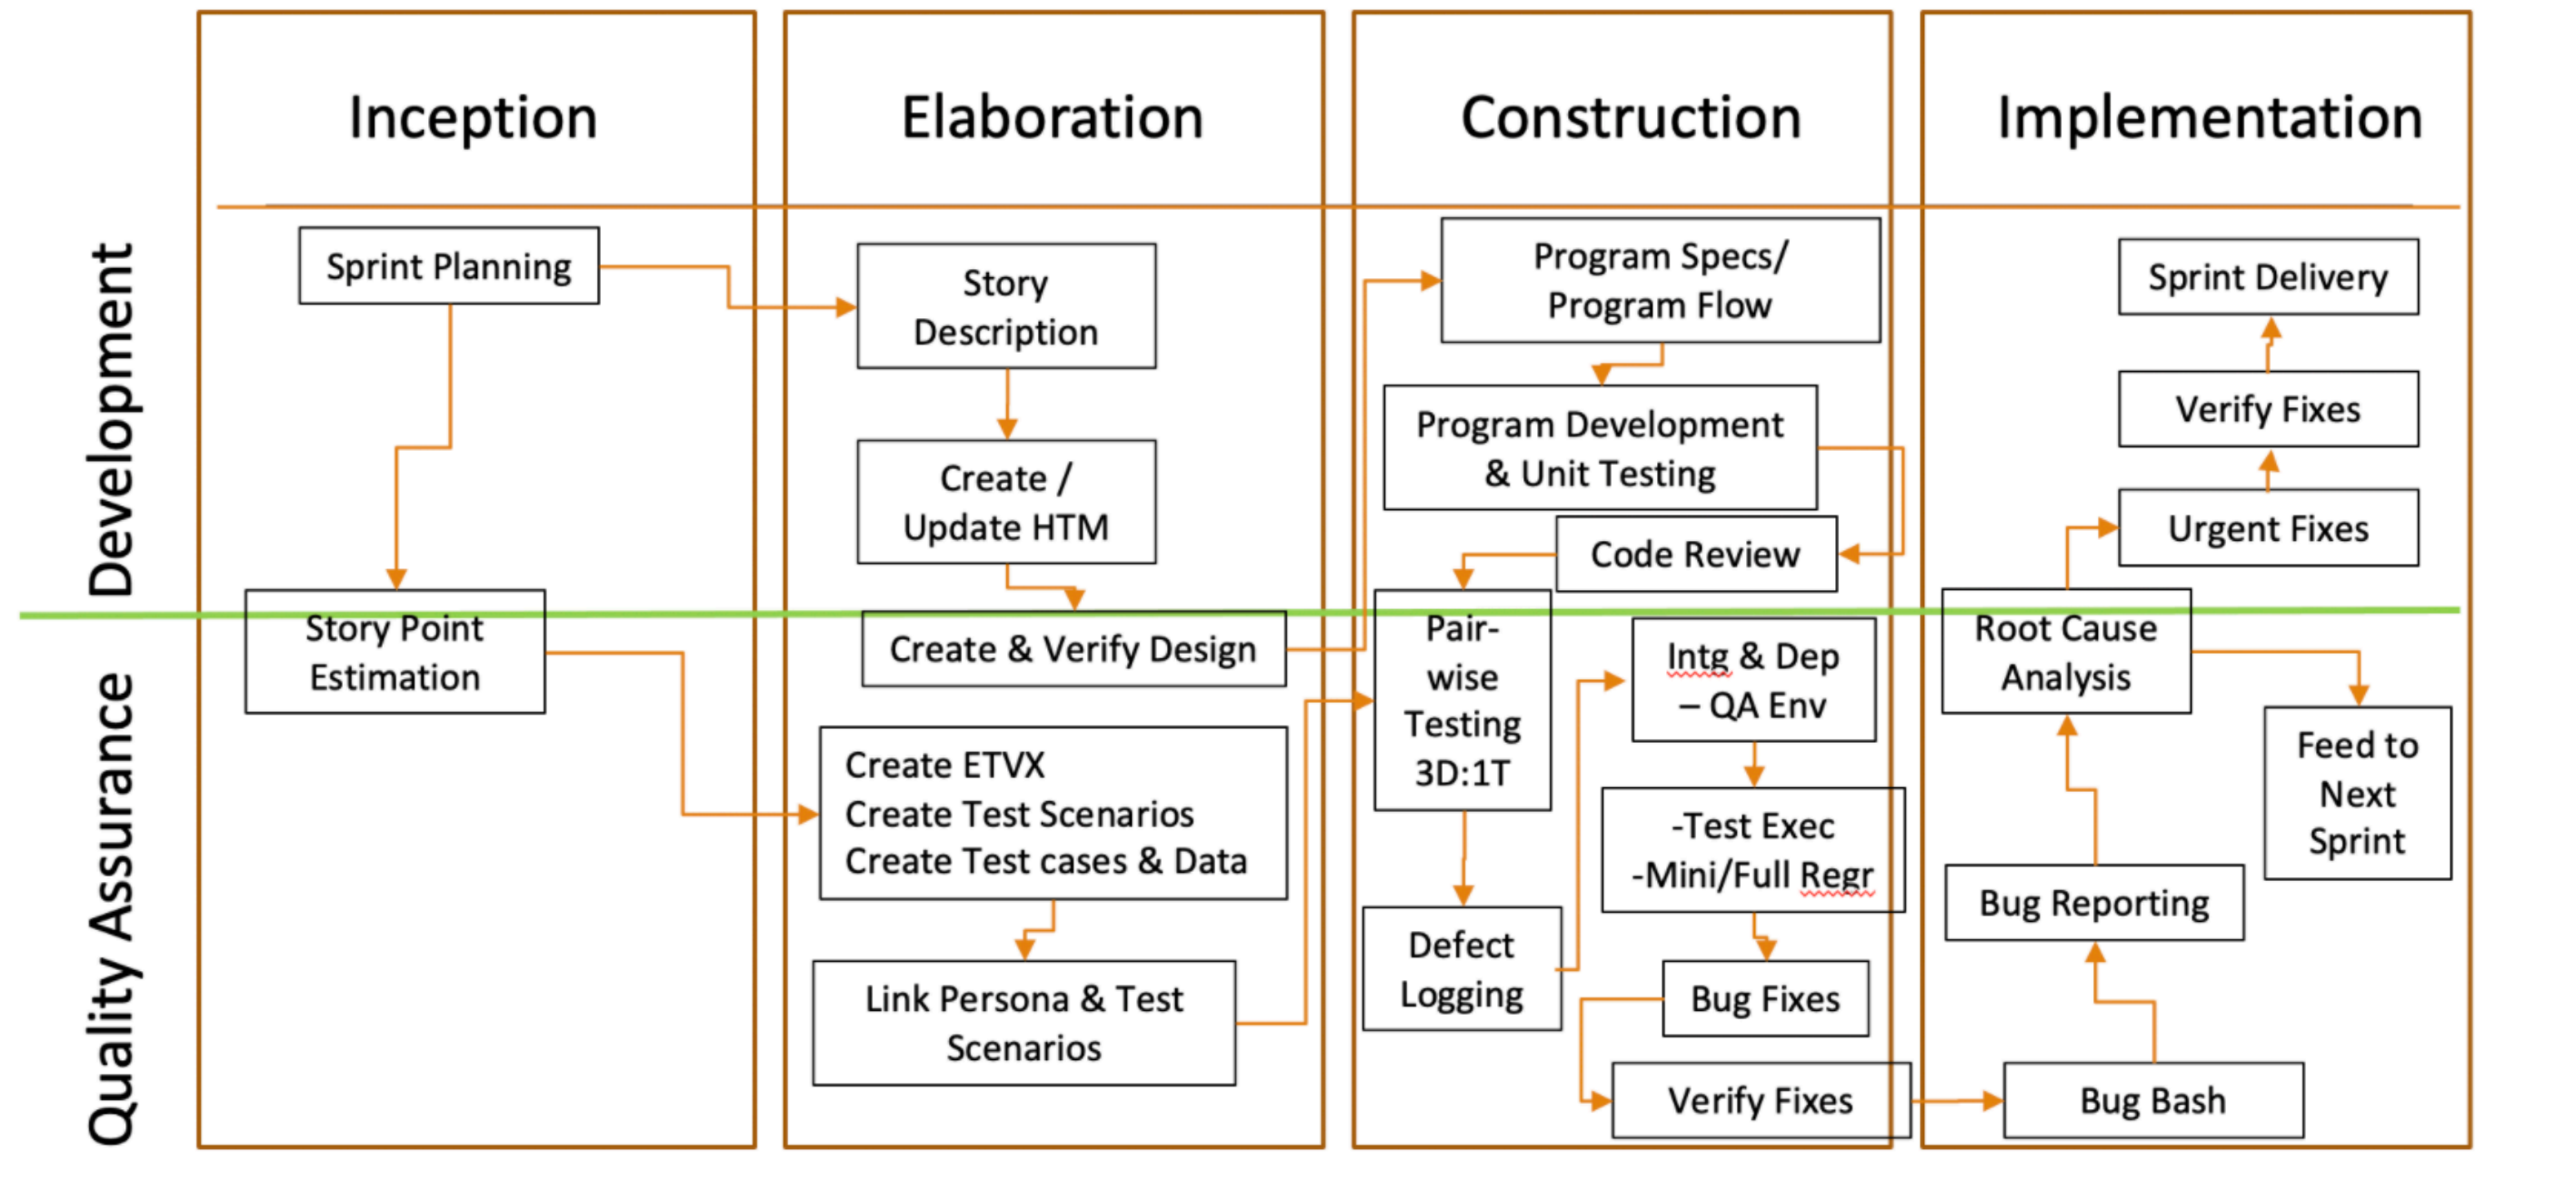

Our QA Methodology

Our Product Test Strategy

The process overview of SOPs followed at KiwiQA is illustrated below. The steps followed and activities vary in terms of Agile and waterfall development models.

Product test strategy

Delivery

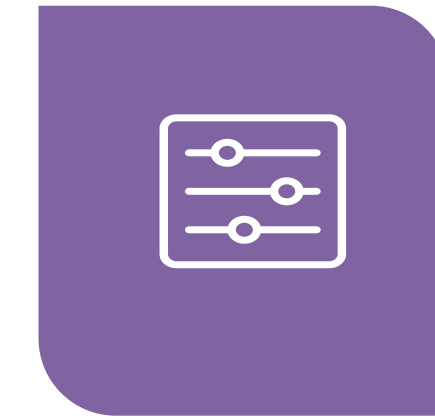

Managed QA Services

Staff Augmentation

On-shore/Offshore Testing

Outcome Based
