The **ACM Special Interest Group on Security, Audit and Control** (SIGSAC)'s mission is to develop the information security profession by sponsoring high quality research conferences and workshops. SIGSAC conferences address all aspects of information and system security, encompassing security technologies, secure systems, security applications, and security policies. Security technologies include access control, assurance, authentication, cryptography, intrusion detection, penetration techniques, risk analysis, and secure protocols. Security systems include security in operating systems, database systems, networks and distributed systems, and middleware. Representative security applications areas are information systems, workflow systems, electronic commerce, electronic cash, copyright and intellectual property protection, telecommunications systems, and healthcare. Security polices encompass confidentiality, integrity, availability, privacy, and survivability policies, including tradeoff and conflicts amongst these.

The **Association for Computing Machinery** (ACM) is an educational and scientific computing society which works to advance computing as a science and a profession. Benefits include subscriptions to *Communications of the ACM*, *MemberNet*, *TechNews* and *CareerNews*, full and unlimited access to online courses and books, discounts on conferences and the option to subscribe to the ACM Digital Library.
