# noctua
## DESIGNED IN AUSTRIA
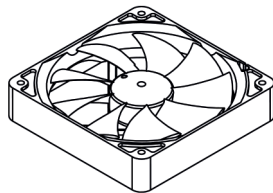

The NA-AV3 mounts feature five defined, numbered pawls for standard open corner fans (pawl 1) and 10, 14, 15, 20 or 25mm thick fans with closed corners (pawls 2 to 5).

for 10mm thick closed corner fans

10mm

PAWL 3

for 14/15mm thick closed corner fans

14/15mm

PAWL 4

for 20mm thick closed corner fans

20mm

PAWL 5

for 25mm thick closed corner fans

25mm

**1** First pull the F side through the fan's mounting holes until the appropriate pawl is all the way through the hole.

Caution: Only pull the appropriate pawl through the hole. Don't overstretch the mounts by pulling the next pawl through!

**2** Then pull the C side through the mounting holes of the case.

If the long ends of the mounts are in the way, you can use scissors to cut them after installation. Note that this will then make them difficult to reinstall in the future.
